HOW TO AVOID THE NEGATIVE ECONOMIC IMPACTS OF A NATURAL DISASTER, PART 2

MAKING HISTORIC BUILDINGS MORE RESILIENT TO HURRICANE & FLOOD EVENTS

Join Leverage NC in a three-part series titled Hot to Avoid the Negative Economic Impacts of a Natural Disaster.

With the month of June comes the onset of Hurricane Season. This three-part series will help you be economically stronger and more resilient through the before and after phase of a natural disaster.

Learn what you can do to be better prepared before a disaster, how to plan for a more successful recovery after the disaster and how to protect your historic building so they continue to be assets in your community for economic development and investment opportunities.

PART 2 | JULY 28

Making Historic Buildings More Resilient to Hurricane & Flood Events

This webinar will share how varying factors can affect the severity of hurricane impacts on buildings, including how wind-driven rain and flooding inflict storm damage to historic buildings; emergency stabilization of buildings; proper methods to safely dry a building; how historic materials may be better at withstanding storms; the preservation of those historic materials; and how to make historic buildings more resilient to high wind and flood events – including elevating them.

SPEAKER

Jeff Adolphsen, RLA

Senior Restoration
Specialist, Restoration
Services Branch, North
Carolina State Historic
Preservation Office
